Your search for the Dental Patient & Clinic Management software ends here

Scenario 1

A. I want to grow my dental practice. I want the PMS software that can handle the growing needs.

B. I am not sure about the growth. I am ok with any software if it satisfies my current need.

Scenario 2

A. I want a PMS software to be customized for my practice which should be simple and user friendly.

B. I want any PMS software as long as it maintains patient & clinical record.

Scenario 3

A. I want my PMS software to work offline. I need the patient database in my system because data is an asset.

B. I don't care, if the data storage is on the cloud or server is not secured as long as it serves the purpose.

Scenario 4

A. I do not want to spend software cost for month on month. I wish to have a software permanently.

B. I am not worried about spending additional cost month on month provided the charges are very nominal.

If you choose option 'A' for all the scenarios then DentICS is just right choice for you!

Highlights:
